Description of first aid measures   First-aid measures general   First-aid measures after inhalation   First-aid measures after skin contact	: Never give anything by mouth to an unconscious person. If you feel unwell, seek medical advice (show the label where possible).
First-aid measures general First-aid measures after inhalation	advice (show the label where possible).
First-aid measures after inhalation	advice (show the label where possible).
First-aid measures after skin contact	: Allow victim to breathe fresh air. Allow the victim to rest.
	: Remove affected clothing and wash all exposed skin area with mild soap and water, followed by warm water rinse.
First-aid measures after eye contact	: Rinse immediately with plenty of water. Obtain medical attention if pain, blinking or redness persist.
First-aid measures after ingestion	: Rinse mouth. Do NOT induce vomiting. Obtain emergency medical attention.
	Notes to physician: Because of the possible disturbances of cardiac rhythm, catecholamine drugs such as epinephrine should be used with special caution and only insituations of emergency life support. Treatment of overexposure should be directed at the control of symptoms and the clinical conditions.
4.2. Most important symptoms and effe	cts (acute and delayed)
